

RUPERT RESOURCES LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS – QUARTERLY HIGHLIGHTS
FOR THE THREE AND SIX MONTHS ENDED
AUGUST 31, 2019

Introduction

The following interim management's discussion and analysis ("MD&A") of Rupert Resources Ltd. ("Rupert" or the "Company") for the three and six months ended August 31, 2019 has been prepared to provide material updates to the business operations, liquidity and capital resources of the Company since its last annual management's discussion & analysis for the fiscal year ended February 28, 2019 ("Annual MD&A"). This MD&A does not provide a general update to the Annual MD&A, or reflect any non-material events since date of the Annual MD&A.

This MD&A was written to comply with the requirements of National Instrument 51-102 - Continuous Disclosure Obligations. This discussion should be read in conjunction with the unaudited condensed interim financial statements for the three and six months ended August 31, 2019 in addition to the audited annual financial statements for the years ended February 28, 2019 and February 28, 2018, together with the notes thereto. Results are reported in Canadian dollars, unless otherwise noted. The Company's financial statements and the financial information contained in this MD&A are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC"). The unaudited condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS. Information contained herein is presented as of October 11, 2019 unless otherwise indicated.

For the purposes of preparing this MD&A, management, in conjunction with the Board of Directors, considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of Rupert's common shares; (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board of Directors, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Description of Business

Rupert is a company incorporated under the laws of the Province of British Columbia. The Company has five projects located in Finland, Ontario and British Columbia. The Company's core focus is the fully-permitted Pahtavaara mine and mill and exploration property including a contiguous 297km² regional licence holding (together: "**Pahtavaara**") in the Central Lapland Greenstone Belt ("**CLGB**") of Northern Finland.

The ability of the Company to continue as a going concern is dependent upon its ability to obtain additional financing. Rupert's financial statements have been prepared on the basis that the Company is a going concern and do not include adjustments that would be necessary should the Company be unable to continue as a going concern. The Company is actively seeking additional sources of liquidity and reducing discretionary expenditures where possible in order to preserve and enhance its liquidity.

The Company's outstanding common shares trade on the TSX Venture Exchange under the symbol RUP. As at August 31, 2019, an investor of the Company, Alan Brimacombe, controls 19,505,900 common shares of the Company or approximately 15% of the total common shares outstanding. To the knowledge of directors and officers of Rupert, the remainder of the Company's outstanding common shares are widely held. These holdings can change at any time at the discretion of the owner.

Overall Performance

The following significant events occurred during the three and six months ended August 31, 2019:

On March 1, 2019, the Company announced that on-going Base of Till (“BoT”) sampling had delineated further gold anomalies both near-mine in the Arttu target area and at Area 1, a previously untested area in the southwest of the licence – this target had been identified by geophysics and the new regional geological interpretation.

On May 21, 2019, the Company announced initial results from the Area 1 target area. In a focussed diamond drill program, four holes were planned to confirm separate targets. Three of these intercepted anomalous mineralisation within distinct metasedimentary sequences. Significant intercepts include 10.5m grading 3.55g/t Au in hole 119032, 90m below a base of till anomaly of 21g/t Au. Hole 119033 intersected 2.0m grading 3.4g/t Au along with broad zones of lower grade gold and copper mineralisation associated with sulphides throughout the length of the hole.

On July 16, 2019, the Company filed an application to amend the terms of its 5.00% secured convertible debentures with an outstanding aggregate principal amount of CAD\$7,705,000 (the “Convertible Debentures”). The amendment decreases the conversion price at which each Convertible Debenture will be convertible into common shares of the Company (“Common Shares”) from CAD\$0.95 per Common Share to CAD\$0.85 per Common Share.

On August 21, 2019, the Company announced that it intended to complete a non-brokered private placement of up to 9,000,000 common shares of the Company at a price per share of \$0.85 for gross proceeds of up to \$7,650,000 (the “*Private Placement*”). The Company concurrently announced that as at that date, holders of over 93% of the Company’s 5.00% secured convertible debentures (the “Convertible Debentures”), equivalent to an outstanding principal amount of \$7,172,500, had exercised their conversion rights.

The issuance to Directors and management of stock options to acquire shares in the Company was announced on August 23, 2019. The Company granted 2,565,000 options with an exercise price of \$0.87 per share. The options expire on August 21, 2024, with 50% vesting after 12 months and the remainder after 24 months.

Other Events after the Reporting Period

The Company announced on September 9, 2019 that it had closed the Private Placement and was issuing 8,532,940 new, Common shares in the Company at a price of \$0.85 per share to raise gross proceeds of \$7,252,999. The Company also announced that holders of 95% of the Convertible Debentures and representing a principal amount of \$7,367,500, had exercised their rights to convert at a price of \$0.85, resulting in an issuance of 8,667,643 new, Common shares in the Company. The remaining principal amount of the Convertible Debentures of \$340,000 was repaid in cash, together with unpaid, accrued interest.

On September 10, 2019, the Company provided an update on exploration activities at Pahtavaara. This included: results from follow-up drilling at Area 1 conducted in early summer 2019; commencement in September of a regional diamond drill program of up to 15,000 metres over the next 6 months, including at Area 1; conclusions of an updated regional geological interpretation and planning for further near-mine drilling at Pahtavaara to improve confidence in the current Indicated resource and test potential extensions to known gold mineralisation.

Potential Dilution

The issue of common shares of the Company upon the exercise of the options and warrants will dilute the ownership interest of the Company's current shareholders. The Company may also issue additional options

and warrants or additional common shares from time to time in the future. If it does so, the ownership interest of the Company's then current shareholders could also be diluted.

Exploration and Evaluation Update

Northern Finland

Pahtavaara

The geology program at Pahtavaara continues to comprise two main work streams: firstly, the definition of new resources in close proximity to underground mine infrastructure and at surface within 1km of the Pahtavaara mill. Secondly, evaluation of the resource potential on the wider claims held by Rupert in the area around Pahtavaara. In the three and six months to end-August 2019 the focus has been on the regional exploration program, with new data from regional geophysics, structural analysis, base of till sampling and diamond drilling leading to the Area 1 gold discovery 20km from the Pahtavaara mill, as announced on May 21, 2019 (see "*Overall Performance*").

Regional Exploration

The Company completed the consolidation of historic geological and geochemical information into its in-house database during the 2018/19 fiscal period. Re-interpretation of existing geophysical data and the collection of new data was undertaken. New data has included a magnetic surveying program using an Unmanned Aerial Vehicle ("UAV") over 5,377 line-kilometres and a ground gravity survey completed in the spring of 2019.

The company has developed a revised regional geological interpretation which is being used to generate exploration targets both in proximity to the existing mine and throughout the licence package held at Pahtavaara. These targets are followed up with initial mapping and surface sampling of outcrops and boulders. However, given the extensive glacial till cover in the region the Company is undertaking an extensive Base of Till (BoT) sampling program. This work commenced in June 2018, and as at end-September 2019 over 7,000 base of till samples had been taken and a number gold anomalies defined across the of the Company's licence package, including in an area called "Area 1".

An initial reconnaissance diamond drill program totalling 31 holes and 3,569m to test anomalies at Area 1 and Paskamaa commenced in February 2019 and ended in June 2019. Initial results from the first four holes totalling 525m drilling at Area 1 identified three new occurrences of gold mineralisation that were announced by the Company on May 21, 2019. Subsequent results from follow-up drilling were announced on September 10, 2019, along with the commencement of a regional diamond drilling program of circa 15,000 metres aimed at following up on a number of targets, including in Area 1. (see "*Other Events after the Reporting Period*")

The 2019 summer field work at Pahtavaara has focussed on further detailed mapping and surface and BoT geochemical sampling at key target locations across the license area. Regional structural mapping was undertaken and incorporated into a further update to the regional geological interpretation, which highlighted mineralised structures and further constrained target areas for follow up field work. In total, 1,219 boulder and rock samples were taken with anomalous samples identified at Saitta (Area 1) and Valimaa. The program also included some in-pit sampling at Pahtavaara Mine which will assist targeting for resource extensions.

Pahtavaara Mine

In October 2019, a drilling program of up to 7,000 metres will be initiated using surface reverse circulation drilling as well as diamond drilling from surface and existing underground infrastructure. The program is directed at improving the level of confidence in the current Inferred mineral resource of 474 thousand ounces at 3.2 grams per tonne, as well as following up on potential extensions to known gold mineralisation. Further information is provided in the Company's announcement of September 10, 2019 (see "Other Events after the Reporting Period").

Central Finland

Hirsikangas

The summer 2019 fieldwork program commenced at the Hirsikangas property in May with over 1,081 field observations made and 1,300 outcrop, boulder and BoT samples submitted for assay by early October. The main target of summer 2019 field program was to undertake field mapping and surface sampling on the recently applied permit areas in order identify drill targets. A BoT sampling program over the Hanni occurrence was completed, with the intent to determine the continuity and extent of the previously drill proved mineralisation.

Osikonmäki

The Company has re-engaged with local stakeholders at Osikonmaki and believes that a new exploration licence could be awarded within the next two or so years. Rupert has also expanded the property in its licence application to accommodate a previously identified gold anomaly.

Canada

Rupert is exploring opportunities to fund future work at the Gold Centre property in the Red Lake district with a strategic or joint venture partner. During the three and six months ended August 31, 2019, the Company spent \$nil (three and six months ended August 31, 2018 - \$nil) on general exploration costs.

Discussion of Operations

Three months ended August 31, 2019, compared with three months ended August 31, 2018

Rupert's net income totaled \$1,001,534 for the three months ended August 31, 2019 with basic and diluted gain per share of \$0.01. This compares with a net loss of \$1,169,927 with basic and diluted loss per share of \$0.01 for the three months ended August 31, 2018. No revenue was recorded in either period.

The net income increased by \$2,171,461 due to the following:

The Company recorded a gain on debt conversion of \$2,242,636

Share-based payments increased by \$59,110 as a result of the stock options vested.

General and administrative expenses decreased to \$546,097 which was \$28,387 lower than the comparable period primarily due to decreases in professional fees of \$34,802, office and sundry of \$13,143, and salaries and benefits of \$8,396 which was offset by increases in travel of \$21,040 and regulatory fees of \$12,697.

Accretion & interest expense of \$353,032 (non-cash) was incurred as a result of the convertible debentures, as compared to \$310,277 for the three months ended August 31, 2018.

Rupert Resources Ltd.
Management's Discussion & Analysis – Quarterly Highlights
Three and Six Months Ended August 31, 2019
Dated – October 11, 2019

Six months ended August 31, 2019, compared with six months ended August 31, 2018

Rupert's net loss totaled \$304,746 for the six months ended August 31, 2019 with basic and diluted gain per share of \$0.00. This compares with a net loss of \$2,431,327 with basic and diluted loss per share of \$0.02 for the six months ended August 31, 2018. No revenue was recorded in either period.

The net loss decreased by \$2,394,305 due to the following:

The Company recorded a gain on debt conversion of \$2,242,636

Share-based payments increased by \$124,444 as a result of the stock options vested.

General and administrative expenses decreased to \$1,035,208 which was \$83,344 lower than the comparable period primarily due to decreases in office and sundry of \$23,035, travel of \$21,476, professional fees of \$15,096, and transfer agent of \$12,913.

Accretion & interest expense of \$699,715 (non-cash) was incurred as a result of the convertible debentures, as compared to \$612,184 for the six months ended August 31, 2018.

Liquidity and Capital Resources

As at August 31, 2019, the Company had working capital of \$133,066 (February 28, 2019 - \$(2,402,567)). This included *inter alia* cash and cash equivalents of \$1,200,803 (February 28, 2019 - \$5,949,381). The Company is seeking additional sources of liquidity (see "Other Events after the Reporting Period"). There can be no assurance that additional financing or shareholder loans, if and when required, will be available on terms acceptable to the Company.

Share Capital

As at the date of this MD&A, the Company had 139,929,156 issued and outstanding common shares, 10,700,000 stock options with exercise prices between \$0.175 and \$1.01, and expiry dates between March 2021 and August 2024.

Disclosure of Internal Controls

Management has established processes to provide them with sufficient knowledge to support representations that they have exercised reasonable diligence that (i) the unaudited condensed interim financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the financial statements; and (ii) the unaudited condensed interim financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

Rupert Resources Ltd.
Management's Discussion & Analysis – Quarterly Highlights
Three and Six Months Ended August 31, 2019
Dated – October 11, 2019

- i. controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii. a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP (IFRS).

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Related Party Transactions

Rupert entered into the following transactions with related parties:

Names	Three months Ended August 31, 2019 \$	Three months Ended August 31, 2018 \$	Six months Ended August 31, 2019 \$	Six months Ended August 31, 2018 \$

- (1) With the exception of the Chief Executive Officer, the Board of Directors do not have employment or service contracts with the Company.
- (2) The Non-Executive Chairman was appointed to the Company on June 25, 2018 and the Board resolved to pay him a fee of \$ 3,000 per month, starting from July 1, 2018. During the three and six months ended August 31, 2019, \$9,000 and \$18,000 respectively (three and six months ended August 31, 2018 - \$6,000) was expensed as salaries.
- (3) The Company entered into an agreement with the Chief Executive Officer of the Company to pay him a monthly base salary GBP15,000. During the three and six months ended August 31, 2019, \$76,582 and \$157,100 (three months and six months ended August 31, 2018 - \$83,683 and \$169,703 respectively) was expensed as salaries. As at August 31, 2019, the Chief Executive Officer was owed \$nil for salaries and reimbursable expenses (February 28, 2019 - \$789) and this amount was included in amounts payable and accrued liabilities.
- (4) The Company entered into an agreement with the Chief Financial Officer of the company to pay him a monthly base salary GBP5,833. During the three and six months ended August 31, 2019, \$29,035 and \$52,108, respectively (three and six months ended August 31, 2018 - \$30,134 and \$61,253) was expensed as salaries. As at August 31, 2019, the Chief Financial Officer was owed \$nil for reimbursable expenses (February 28, 2019 - \$1,815).

Risks and Uncertainties

The Company's business of exploring for mineral resources involves a variety of operational, financial and regulatory risks that are typical in the natural resource industry. The Company attempts to mitigate these risks and minimize their effect on its financial performance, but there is no guarantee that the Company will be profitable in the future, and the Company's common shares should be considered speculative in nature.

The business of exploration for minerals and mining involves a high degree of risk. A relatively small proportion of properties that are explored are ultimately developed into producing mines. At present, there are no known bodies of commercial ore on any of the mineral properties in which the Company holds interest or intends to acquire an interest and the proposed exploration program is an exploratory search for ore. Unusual or unexpected formations, formation pressures, fires, power outages, labour disruptions, flooding, cave-ins, landslides and the inability to obtain suitable or adequate machinery, equipment or labour are other risks involved in the conduct of exploration programs. The Company has limited experience in the development and operation of mines and has relied on and may continue to rely upon consultants and others for exploration and operating expertise. The economics of developing gold and other mineral properties is affected by many factors including the cost of operations, variation of the grade of ore mined, and fluctuations in the price of any minerals produced.

The success of the Company is dependent, among other things, on obtaining sufficient funding to enable the Company to explore and develop its properties. There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with the possible loss of such properties. The Company will require new capital to continue to operate its business and to continue with exploration on its mineral properties, and there is no assurance that capital will be available when needed, if at all. It is likely such additional capital will be raised through the issuance of additional equity, which will result in dilution to the Company's shareholders.

The operations of the Company may require licenses and permits from various local, provincial and federal governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development, or mining operations, at its projects.

Even if the Company's exploration programs are successful, factors beyond the control of the Company may affect the marketability of any mineral products discovered. The prices of mineral products have historically fluctuated widely and are affected by numerous factors beyond the Company's control, including international, economic and political trends, expectations for inflation, currency exchange fluctuations, interest rates, global or regional consumption patterns, speculative activities and worldwide production levels. The effect of these factors cannot accurately be predicted.

The mining industry is intensely competitive. The Company competes with many companies possessing greater financial resources and technical facilities than itself for the acquisition of mineral interests as well as for the recruitment and retention of qualified employees, contractors and consultants.

The Company's operations are subject to environmental regulations promulgated by local, provincial and federal government agencies from time to time. Environmental legislation provides for restrictions and prohibitions of spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailing disposal areas, which could result in environmental pollution. A breach of such legislation may result in the imposition of fines and penalties. In addition, certain types of operations require submissions to and approval of environmental impact assessments. Environmental legislation is evolving in a manner, which means stricter standards and enforcement, and fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

Certain directors or proposed directors of the Company are also directors, officers or shareholders of other companies that are similarly engaged in the business of acquiring, developing and exploiting natural

resource properties. Such associations may give rise to conflicts of interest from time to time. The directors of the Company are required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interest, which they may have in any project opportunity of the Company. If a conflict of interest arises at a meeting of the Board of Directors, any director in a conflict will disclose his interest and abstain from voting on such matter. In determining whether or not the Company will participate in any project or opportunity, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at that time.

The Company does not have a historical track record of operating upon which investors may rely. Consequently, investors will have to rely on the expertise of the Company's management. Further, the Company's properties are in the exploration stage and are not commercially viable at this time. The Company does not have a history of earnings or the provision of return on investment, and there is no assurance that it will produce revenue, operate profitably or provide a return on investment in the future.

At present, there are no known bodies of commercial ore on any of the mineral properties in which the Company holds interest or intends to acquire an interest and the proposed exploration program is an exploratory search for ore. Further, the Company's properties are in the exploration stage and are not commercially viable at this time.

Management's Responsibility for Financial Information

The Company's financial statements are the responsibility of the Company's management, and have been approved by the Board of Directors. The financial statements were prepared by the Company's management in accordance with Canadian generally accepted accounting principles. The financial statements include certain amounts based on the use of estimates and assumptions. Management has established these amounts in a reasonable manner, in order to ensure that the financial statements are presented fairly in all material respects.

Caution Regarding Forward-looking Statements

The MD&A contains forward-looking information within Canadian securities laws (collectively "forward looking statements") concerning the anticipated developments in the Company's operations in future periods, its planned exploration activities, the adequacy of its financial resources and other events or conditions that may occur in the future. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

Statements concerning mineral reserve and resource estimates may also be deemed to constitute forward-looking statements to the extent that they involve estimates of the mineralization that will be encountered if the property is developed. Any statements that express or involve predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects", "anticipates", "plans", "projects", "estimates", "assumes", "intends", "strategy", "goals", "objectives", "potential" or variations thereof, or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement.

The following table outlines certain significant forward-looking statements contained in this MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward looking statements.
